

A Proposal to Establish AFRICAN CREDIT TRANSFER SYSTEMS

Tuning Africa Phase II

5th General Meeting, Brussels, 13-15 November 2017

Damtew Teferra, Prof.

Higher Education Training and Development, University of Kwazulu-Natal

Key Policy Imperatives

The Vision of African Union: To build an integrated continent requires a harmonized education system where intra-African mobility and skills portability are key elements in its realization.

Key Policy Imperatives

 Harmonized education and training systems are essential for effective implementation of the Continental Education Strategy for Africa (CESA) and Agenda 2063 and key to mutual recognition of academic qualifications.

Definitions

 Credit: A measure of workload required for a typical learner to achieve the objectives of a program, specified in terms of the Learning outcomes and Competences to be acquired – (student workload required to achieve expected learning outcomes)

Workload: An estimation of the learning activities such as lectures, seminars, projects, practical work, work placements, individual study measured in time, which a learner typically needs to achieve the defined learning outcomes.

Objectives of a Credit System

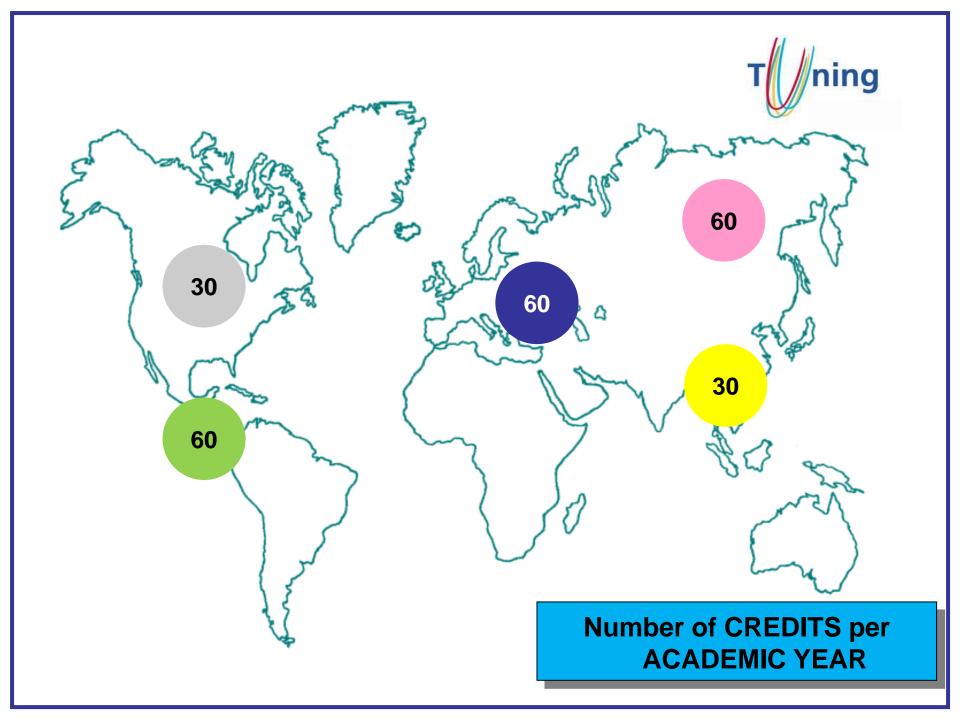

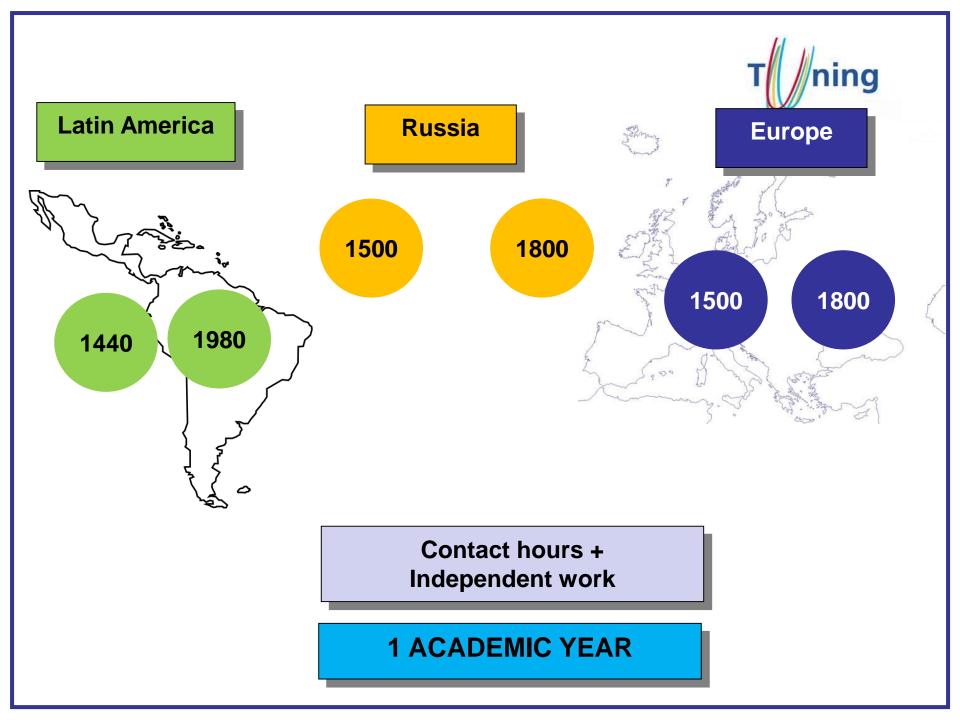

- Advances harmonization and promote student mobility
- ii. Improve the comparability and compatibility of study programmes
- iii. Render more transparency to study programmes
- iv. Provide more flexibility and diversity of pathways
- v. Facilitate easier development of well-balanced programmes
- vi. Promote feasibility of programmes
- vii. Enhance quality of programmes
- viii. Advance recognition of (periods of) studies taken elsewhere successfully
- ix. Facilitate different types of learning such as informal, non-formal, formal, part-time, among others.
- x. Facilitate more substantive collaboration among different higher learning and research institutions towards a common higher education space.

Underlying Fact

Africa lacks a reliable means of measuring and transferring acquired knowledge in the realization of the stated key policy imperatives and the objectives—hence ...

Proposal

The Undertaking to Establish the

AFRICAN CREDIT TRANSFER SYSTEMS

WORKLOAD

A Review Survey on workload

- -571 academics
- **—5,266 students**
- —107 institutions
- Question: What is the extent of workload to learn a unit in a semester in terms of contact hours and independent study?

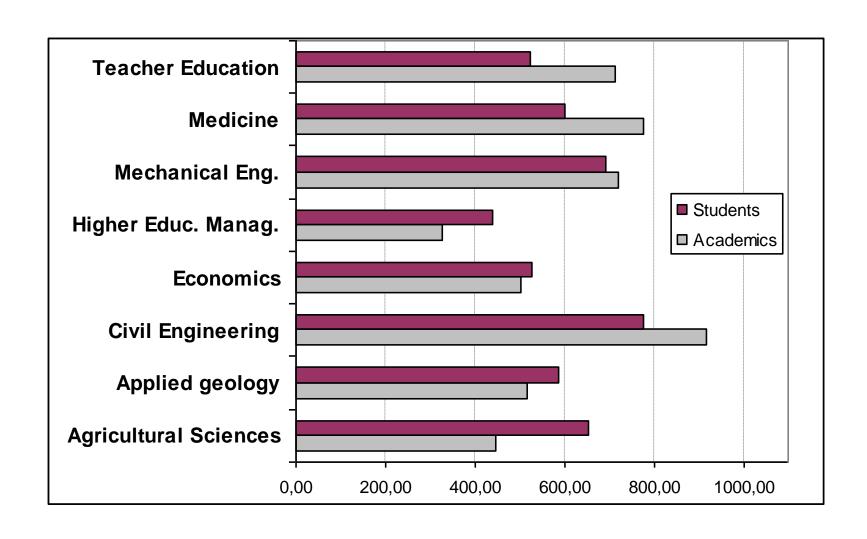

Fields/Disciplines

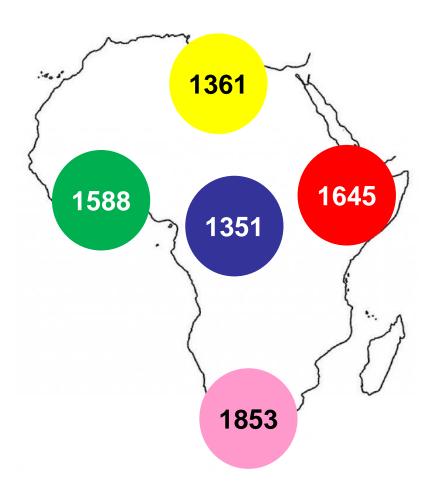

- Agricultural Sciences
- Economics
- Civil Engineering
- Mechanical Engineering
- Applied Geology
- Medicine
- Teacher Education
- Higher Education Management

Findings: Hours Needed

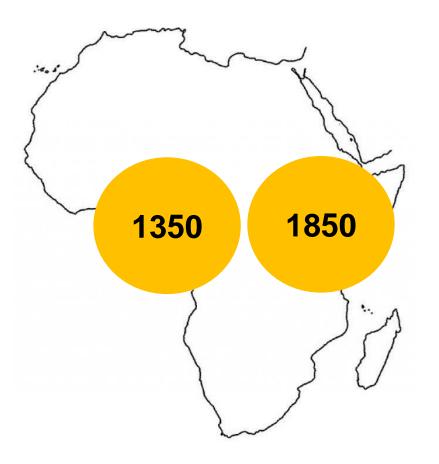

Academics

Students

Contact hours + Independent work

1 ACADEMIC YEAR

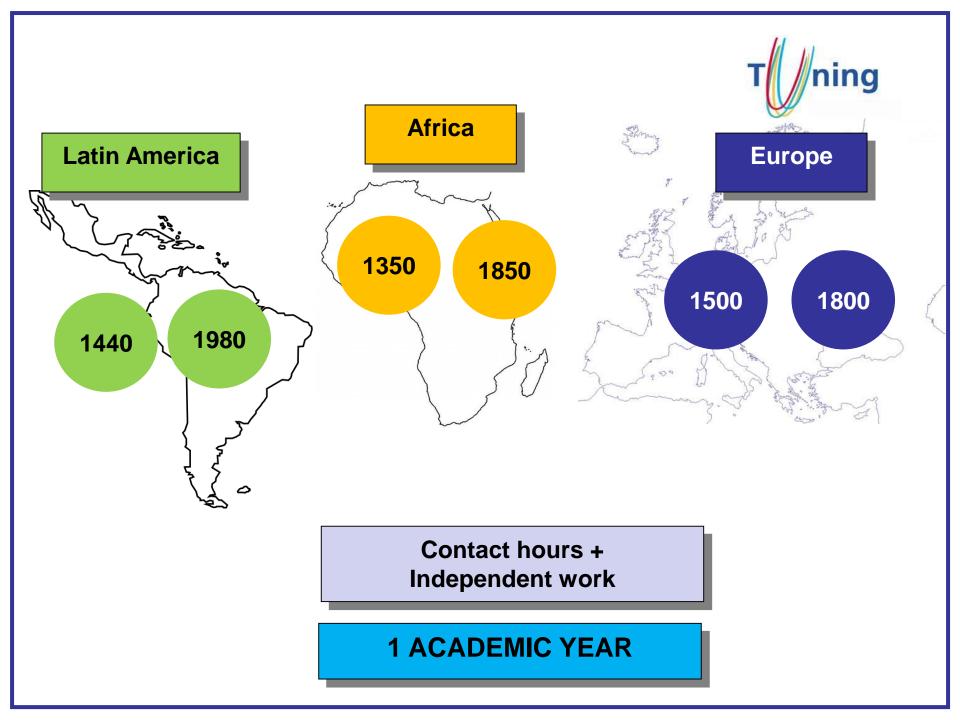

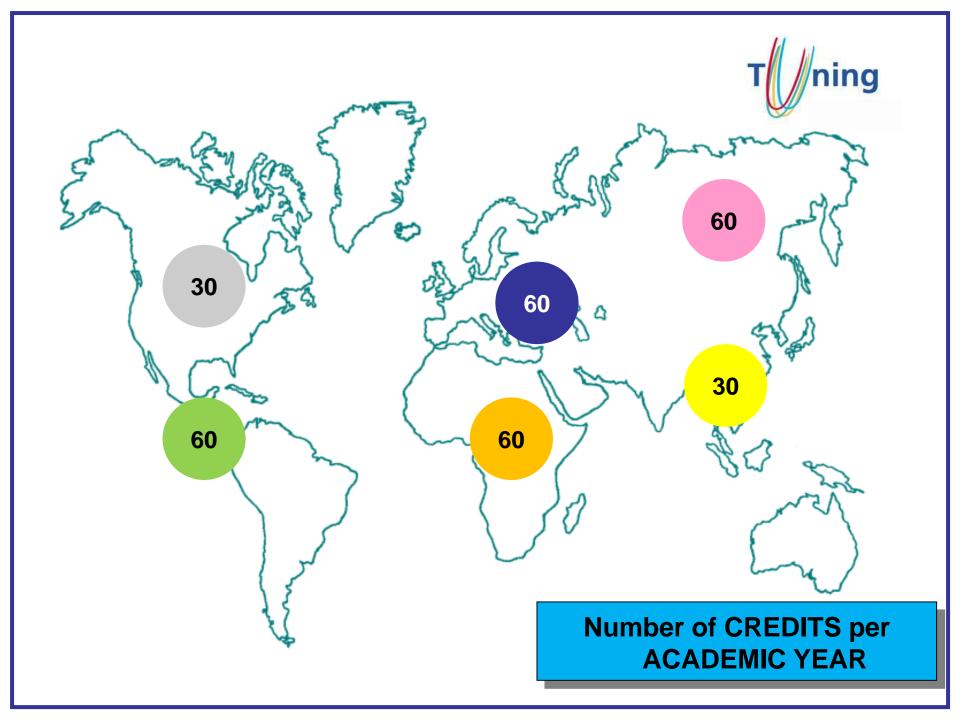

Academics

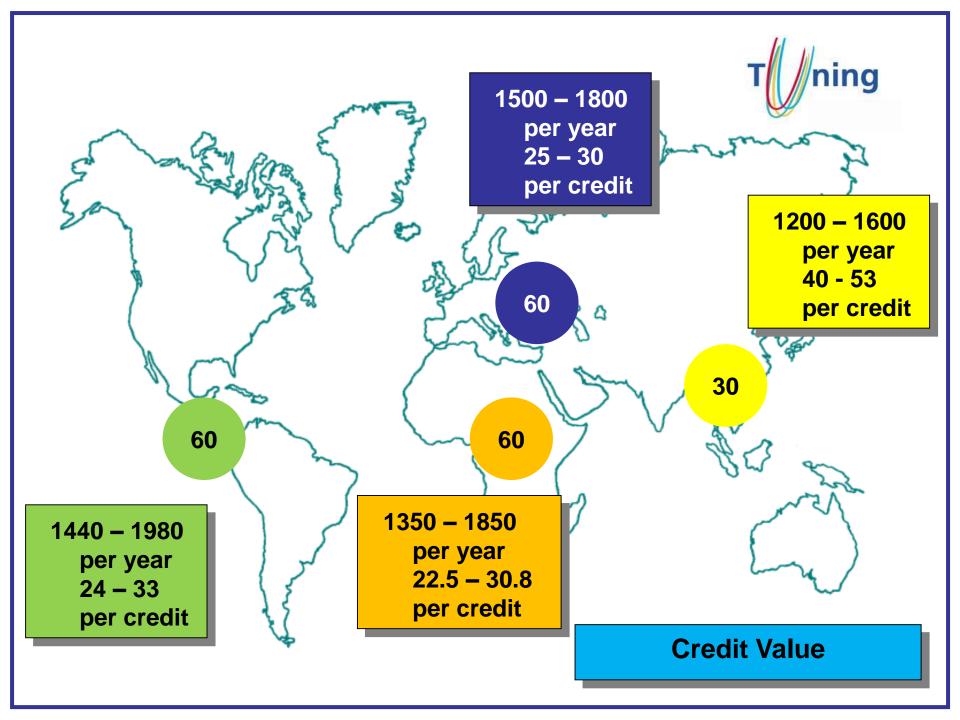

Students

Contact hours + Independent work

1 ACADEMIC YEAR

Conclusion

- Credit system has been functional in the African Higher Education systems for many years.
- ii. African universities consider credit as a tool for measuring the load of the teacher rather than as an expression of the volume of learning based on defined learning outcomes and associated workload.
- iii. In many African institutions, credit is measured based on the contact time with the teacher.
- iv. Credit does not have the same value in all the countries and regions. (Anglophone and Francophone credit systems differ.)
- v. There is currently no credit transfer system among institutions in Africa.
- vi. The load of credit is not comparable among institutions in Africa.

Recommendation

 The general trend is that 60 credits are equivalent to the workload of full-time student during one academic year. We thus recommend to adopt this widespread international trend of 60 credits for Africa.

Recommendation

 There is a need for a consensus on the student workload over a period of a year which straddles between 1,350 and 1,800 hours. We thus recommend to adopt between 1,350 and 1,800 hours of workload for Africa which sits well within the international norms.
